

## 2) Living well

The next stage is to help everyone from 18 to 65 to have the services they need like cancer, dementia, mental health and primary care (which is being able to get help from) the

- Doctors
- Chemists
- Dentists  
etc.

Community  
LivingWell

Working together for your wellbeing

## 3) Ageing well

The third stage is for people aged 65 and over.

We will work with family, carers and people in the community to make sure they have good Health and Care services and more control over their health and wellbeing.

The people who plan health and care in Doncaster want to:

- Work closely with local communities to support them to manage their own health and wellbeing, including physical and mental health
- Make sure people get the level of services they need
- Work together to deliver care – to make sure all health and care needs of individuals and their families are considered.
- Develop care for people when they are in crisis – making it easier for them to get health and care services when they need them the most.
- Work together to support the people who have complex needs to make sure their health and care needs are met.
